

# ESSENTIAL BLACK SPOT REMOVER

FOR PROFESSIONAL USE

**5L** **25L** SKU: SC4U\_ERC\_BSR05 / SC4U\_ERC\_BSR25

## DESCRIPTION

**Powerful outdoor cleaner for the targeted removal of black spot & lichen from stone and masonry**

SC4U ESSENTIAL BLACK SPOT REMOVER is a high performance cleaner specially formulated to remove stubborn black spots from natural stone and other outdoor stone and masonry surfaces. For best results, apply, agitate with a stiff brush or broom, then leave for around 2-3 hours before rinsing off. It will quickly remove layers of dirt and grime as well as green algae, lichen and black spot deposits. For long-standing black spot deposits 2-3 applications may be required. Unlike acid based cleaners, the alkaline solution will not damage or etch the surface of the stone. Apply neat on areas of heavy surface contamination, or dilute 1:1 for less dirty areas.

## HOW TO APPLY

1. Before use, remove any loose debris from the surface area and ensure you have adequate personal protection; i.e gloves, suitable protective eye-wear, face mask & clothing.
2. **Essential Black Spot Remover should always be used neat.** Always perform a small test area to determine suitable dwell time. Carefully transfer the cleaning fluid from the bottle to a pump sprayer or watering can. If these containers are not available then cleaning fluid can be used directly from the bucket. Apply generously.
3. The cleaning fluid needs to be left on the surface for at least two hours, during that time the surface must not be allowed to dry out. If necessary, mist with additional cleaning fluid to prevent from drying. Work the area(s) of staining with a brush, if necessary, but ensure the surface remains wet at all times. During dwell time, strongly agitate the treated area with a stiff brush or broom. After 2-3 hours dwell time, the treated area should be washed down with clean water first to neutralise the cleaner before then power washing off for perfect results. Please note the cleaning fluid can harm or possibly kill vegetation so try to avoid washing off onto garden or lawn grass. If this unavoidable then rinse with plenty of clean water to dilute the cleaner.
4. **In areas of heavy soiling and extreme, stubborn black spots it may be necessary to extend the dwell time of Essential Black Spot Remover to up to 8 hours or overnight where necessary, before power washing off. To achieve perfect results on aged, stubborn black/white lichen spots, test a small area to ascertain the required dwell time necessary to remove the marks – then follow the instructions above. 2-3 applications may be needed to achieve the desired outcome.**

**Please Note: Essential Black Spot Remover** contains a chlorine type agent as an active ingredient and will stain fabrics and sensitive materials. Take special care to avoid contact with fabrics & tarmac during application. The fluid might cause slight lightening of some surfaces - always try product on-site in an inconspicuous area prior to use.

## COVERAGE

Up to 25m<sup>2</sup> per 5L container.  
Coverage varies depending on surface contamination.

## USAGE GUIDELINES

Dwell Time	Applications/Coats	Application Method	Dilution
2-4 hrs	1-2 applications	Mop/Sprayer/ Roller	Apply neat. Do not dilute

## PRECAUTIONS

**KEEP OUT OF THE REACH OF CHILDREN & PETS**

EUH031: Contact with acids liberates toxic gas. H302: Harmful if swallowed. H314: Causes severe skin burns and eye damage.H400: Very toxic to aquatic life.

P102: Keep out of reach of children. P260: Do not breathe mist, vapours or spray. P262: Do not get in eyes, on skin, or on clothing. P264: Wash skin thoroughly after handling. P273: Avoid release to the environment. P280: Wear protective gloves/protective clothing/ eye protection/face protection. P301+330+331: IF SWALLOWED: rinse mouth and do NOT induce vomiting.
