

# ESSENTIAL BRICK WATERPROOFER

1L 3L 5L

## DESCRIPTION

### A HIGHLY EFFECTIVE WATERPROOFER FOR LASTING PROTECTION TO BRICKWORK & MASONRY

SC4U ESSENTIAL BRICK WATERPROOFER is a high performance deeply penetrating masonry cream specially formulated to help prevent water ingress and issues arising from long term damp to brickwork and masonry. This effective waterproofer provides lasting protection to masonry and brickwork by filling the porous voids in the substrate without blocking them, allowing the surface to 'breathe' and preventing moisture build up. The damp proofing sealer offers excellent water repellency and once applied, is a very effective damp proofer that will form a strong barrier against damp penetration lasting up to 20 years. Unlike waterproof paints and waterproof coatings that are available in DIY stores, SC4U ESSENTIAL BRICK WATERPROOFER is far more effective and lasts much longer. It will also retain the original dry appearance of the substrate so it is ideally suited for application to brickwork, stonework and most forms of unprotected masonry.

SC4U ESSENTIAL BRICK WATERPROOFER provides long lasting protection from water penetration. The easy to apply formula will also provide an effective barrier to flooding as part of any existing flood protection system. It can also produce energy savings as it will improve the thermal efficiency of the brickwork or masonry it is applied to.

## DIRECTIONS FOR USE

Before use, remove any loose debris from the work surface and ensure you have adequate personal protection, i.e. gloves, suitable protective eye-wear, face mask & clothing.

- NOTE:** Following the instructions below, perform a small test application on-site in an inconspicuous area prior to use. This will indicate the suitability and effectiveness of the product for your surface. If unsuitable for your requirements **DO NOT PROCEED**; contact us to return the product.
- Before application the surface must be completely clean and dry. Application by roller or brush.
- Apply the cream generously, normally one coat is needed to ensure complete coverage - it may be necessary to apply a second coat on more porous substrates (see usage guidelines below). **DO NOT DILUTE**. Surface dry after 30-90 minutes. Only apply when no rain is forecast for the next 24 hours.

**Please Note:** SC4U ESSENTIAL BRICK WATERPROOFER has been formulated to be colourless once cured. Slight darkening may occur when it is applied to some substrates - always perform a small test first in an inconspicuous area. Surfaces which are not to be sealed should be protected with masking material. **RECOMMENDED USE ONLY ON BRICK & MASONRY SURFACES.**

## COVERAGE

For best results, one heavy application on standard brickwork at 5m<sup>2</sup> per litre is recommended.

Up to 10m<sup>2</sup> per litre on dense, less absorbent brickwork.

## USAGE GUIDELINES

Drying Time	Applications/Coats	Application Method	Dilution
2-4 hours	1-2 coats	Brush/Roller	DO NOT DILUTE

## PRECAUTIONS

### KEEP OUT OF THE REACH OF CHILDREN & PETS

H302: Harmful if swallowed.  
H315: Causes skin irritation.  
H319: Causes serious eye irritation.

P102: Keep out of reach of children.  
P262: Do not get in eyes, on skin, or on clothing.  
P280: Wear protective gloves.  
P301+330+331: IF SWALLOWED: rinse mouth. Do NOT induce vomiting.  
P302+350: IF ON SKIN: Gently wash with plenty of soap and water.  
P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P309+311: IF exposed or if you feel unwell: Call a POISON CENTRE or doctor.  
P332+313: If skin irritation occurs: Get medical advice.  
P337+313: If eye irritation persists: Get medical advice.
