

ESSENTIAL GREEN AWAY

5L **25L** SKU: SC4U_ERC_GA05 / SC4U_ERC_GA25

DESCRIPTION

Removes all types of organic green growth – simply apply & leave to work over time

SC4U ESSENTIAL GREEN AWAY is a high performance formulation designed to remove organic green growth, algae and mould from most external surfaces. Suitable for roofs, patios, driveways, tennis courts and many other external surfaces, it is a highly effective microbiological biocide that kills green organic growth quickly. Apply neat for quick results on heavy contamination or dilute with water up to 1:5 for less contaminated areas. Biodegradable and safe around pets and children once dry. Stonecare4u Essential Green Away is a microbiological surface biocide that is highly effective for removing green growth, algae and mould from external hard surfaces. Use annually for complete protection - where any green algae, lichen or mould appears during the year, around down pipes and drains, treat locally. You do not need to retreat the whole area.

HOW TO APPLY

Before use, remove any loose debris from the work surface and ensure you have adequate personal protection, i.e gloves, suitable protective eye-wear, face mask & clothing.

- NOTE: Following the instructions below, perform a small test application in an inconspicuous area prior to use. This will indicate the suitability and effectiveness of the product for your surface. If unsuitable for your requirements DO NOT PROCEED; contact us to return the product.**
- For typical applications: using a pneumatic garden sprayer or watering can, add one part **Essential Green Away** to 5 parts water (1:5). For areas of heavier growth (such as roofs) dilute at a ratio of 1:3 or neat if required.
- Mix well and in dry conditions, saturate affected areas, use at a rate **NOT EXCEEDING** 4 square metres per litre. Coverage 1:5 dilution for low to moderate contamination and 1:3 or neat for areas of heavier contamination approximate coverage 60- 125M² per 5L.
- Apply a flood coat spraying in sweeping motion across the surface. A second pass may be necessary to ensure complete coverage.
- Allow to soak in and completely dry on surface - **DO NOT WASH OFF**. Any green growth or algae will start to disappear within days. Very stubborn areas of growth may require a further treatment and should be dislodged with a hose or sprayer if it clings to roof tiles or similar surfaces. After 12 months another application may be necessary if any green growth has started to regrow.

Please Note: do not apply Essential Green Away when the threat of rain is imminent. Always try product on-site in an inconspicuous area prior to use. Extra caution is required when applying near or around fish ponds or similar. If you accidentally over-spray onto delicate plant life, rinse off with clean water.

COVERAGE

1:5 dilution for low to moderate contamination and 1:3 or neat for areas of heavier contamination. 5L treats up to 100sqm. Coverage areas will vary depending on surface contamination and method of application.

USAGE GUIDELINES

Dwell Time	Applications/Coats	Application Method	Dilution
20-30 mins	1-2 applications	Roller/Brush/ Sprayer	1:5 - 1:20

PRECAUTIONS

KEEP OUT OF THE REACH OF CHILDREN & PETS
H314: Causes severe skin burns and eye damage.

- P102: Keep out of reach of children.
- P260: Do not breathe mist, vapours or spray.
- P264: Wash hands thoroughly after handling.
- P280: Wear protective gloves/protective clothing/eye protection/face protection.
- P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P321: Specific treatment (see instructions on this label).
- P333+313: If skin irritation or rash occurs, get medical advice/attention.
- P405: Store locked up.
