

ESSENTIAL PATIO CLEANER

5L **25L** SKU: SC4U_ERC_PAT05 / SC4U_ERC_PAT25

DESCRIPTION

Ready-to-apply patio & path outdoor cleaner
Suitable for cleaning winter dirt and grime

SC4U ESSENTIAL PATIO CLEANER is a high performance cleaner tailored for patio cleaning. It is also suitable for all outdoor stone & masonry surfaces. Apply and leave for at least 2 hours, it works on algae, lichen and light black spot deposits as well as removing dirt and grime even if the patio hasn't been cleaned for years! The acid free, alkaline based solution won't damage or etch the stone surface like acid cleaners. Apply neat for great results - it's outstanding value.

HOW TO APPLY

Before use, remove any loose debris from the work surface and ensure you have adequate personal protection, i.e gloves, suitable protective eye-wear, face mask & clothing.

- NOTE: Following the instructions below, perform a small test application in an inconspicuous area prior to use. This will indicate the suitability and effectiveness of the product for your surface. If unsuitable for your requirements DO NOT PROCEED; contact us to return the product.**
- For best results Essential Patio Cleaner is to be used neat. Carefully transfer the cleaning fluid from the bottle to a pump sprayer or watering can. If these containers are not available then cleaning fluid can be used directly from the bucket.
- The cleaning fluid needs to be left on the surface for at least two hours, during that time the surface **must not be allowed to dry out**. If necessary mist with additional cleaning fluid or with a mist of clean water to prevent the paving from drying. Work the area(s) of staining with a brush, if necessary, but ensure the surface remains wet at all times. After at least two hours dwell time, the treated area should be washed down with clean water first to neutralise the cleaner before then power washing off for best results. Please note the cleaning fluid can harm or possibly kill vegetation so try to avoid washing off onto garden or lawn grass. If this unavoidable then rinse with plenty of clean water to dilute the cleaner.
- In areas of heavy soiling and extreme, stubborn black/white lichen spots it may be necessary to extend the dwell time of Essential Patio Cleaner to up to 4 hours or overnight where necessary, before power washing off. To achieve results on aged, stubborn black/white lichen spots, test a small area to ascertain the required dwell time necessary to remove the marks - then follow the instructions above. 2-3 applications may be needed. Try Essential Patio Perfect if black spot cannot be dislodged.**

Please Note: Essential Patio Cleaner contains a chlorine type agent as an active ingredient and will stain fabrics and sensitive materials. Take special care to avoid contact with fabrics & tarmac during application. The fluid might cause slight lightening of some stone surfaces - always try product on-site in an inconspicuous area on-site prior to use.

COVERAGE

Up to 25m² per 5L container.

Coverage varies depending on surface contamination.

USAGE GUIDELINES

Dwell Time	Applications/Coats	Application Method	Dilution
2-4 hrs	2-4 applications	Mop/Sprayer/ Roller	Apply neat. Do not dilute
