

ESSENTIAL RUST REMOVER

1L **5L** SKU: SC4U_ERC_RUS01 / SC4U_ERC_RUS05

DESCRIPTION

Professional non-acid formula for instant removal of rust & ferrous stains

SC4U ESSENTIAL RUST REMOVER works by eliminating rust stains from iron containing fertilizers, metal garden furniture, leaking heating systems, etc. The easy, ready to use formula is safe and pH neutral, making it suitable for use internally and externally. Watch it get to work immediately as it attacks rust for fast acting results. The acid free, alkaline based solution won't damage or etch the stone surface and only targets rusty / ferrous patches.

Essential Rust Remover is effective for dissolving problematic rust stains caused by iron containing fertilizers, metal garden furniture, leaking heating systems, etc. Essential Rust Remover has an easy to apply, gel-based formula that you can pour straight from the bottle. It will attack the ferrous stains and the chemical formula creates a purple coloured reaction so you can see the remover working immediately after application.

DIRECTIONS FOR USE

1. Generously apply undiluted product to the dry surface and distribute with a brush. A purple discolouration shows the start of the reaction.
2. Allow to work for about 5 minutes, 10 minutes maximum. Do not allow product to dry.
3. After working time, rinse off with plenty of water.
4. **Important: working time must not exceed 10 minutes. Repeat procedure in case of unsatisfactory results. Some stone and coloured concrete may change colour after treatment with Essential Rust Remover.**

Please Note: Always try product in an inconspicuous area on-site prior to use. Always use suitable personal protective equipment (PPE) when using **Essential Rust Remover**.

COVERAGE

Up to 10m² per litre.
Coverage varies depending on surface contamination.

USAGE GUIDELINES

Dwell Time	Applications/Coats	Application Method	Dilution
5-10 mins	1-3 applications	Brush/Roller	Undiluted
